Installation Instructions for PS Suite Custom Form File

- Locate the file that you downloaded that ends with '.cfm'.

- Open the EMR (Records) window.

- From the window's Settings menu, choose Edit Custom Forms.

- Drag and drop the .cfm file into the list of custom forms.

- When you want to use the form for a patient, choose Data > New Custom Form (Cmd-Shift-I) to insert it into a chart.

If you have difficulty installing the form, please email support@cognisantmd.com for assistance
