

CMH Innovation Intake Process

At Cambridge Memorial Hospital, our Research and Innovation Office plays a pivotal role in supporting the evaluation and implementation of new healthcare innovations. Our team is dedicated to helping assess whether novel solutions align with clinical needs, improve patient outcomes, and enhance overall hospital operations.

We provide comprehensive market validation support to innovators, such as:

- **Initial Evaluation:** We support engagement with innovators to assess and understand the potential benefits and technical feasibility of each innovation and provide input and feedback.
- **Clinical Validation:** Our team collaborates with clinicians and researchers to pilot-test innovations within our clinical environment, helping evaluate their fit with real-world needs.
- **Integration Support:** We work closely with IT and operations teams to support integration into existing hospital systems, while minimizing disruptions and promoting efficiency.
- **Data-Driven Insights:** Leveraging data analytics, we provide evidence-based insights to help assess the efficacy and value of new technologies.
- **Regulatory Compliance:** Our expertise in healthcare regulations helps innovators understand whether their innovations align with patient safety and data security standards.

If you are interested in connecting with our Research and Innovation Office for a 1-hour initial assessment, please complete our intake form linked below, and we will follow up with an available timeslot.
